**KASSON KELLER TO PARTICIPATE IN DEPARTMENT OF ENERGY R5 WINDOW PROGRAM**

*DOE Building Technologies Program to list manufacturer as approved vendor*

Kasson and Keller, Inc. announced today that their application for the US Department of Energy's Building Technologies Program's R5 Volume Purchase Program has been selected. The program, scheduled to launch in the spring of 2010 will include Kasson and Keller's Series 4000 and 7000 window lines with DOE R5 Glazing Package.

The DOE R5 product selected for the Volume Purchase Program will feature the company's "super-high-performance" glazing package, comprised of three layers of glass, two high performance low-e coatings, double argon gas fill and high performance spacer system.

The US Department of Energy's Building Technologies Program is coordinating a volume purchase of R-5 windows and low-e storm windows, to expand the market of these high efficiency products.
